The waters rushing over the low lands 1883 did not turn over to the council about the depot come from a bend in the elect any statement whatever pertaining river at a point about three miles above the city. It seems that an embankment was thrown up many years ago at that place, but having been neglected for some time it has become weakened so that the current of the river rushing against it, a break resulted through which the waters flow. We have it from one qualified to judge that on expenditure of not to exceed five hundred dellars will repair the break and so strengthen the whole werk, that Socorro and vicinity will be absolutely free from overflow in the future. The work can be performed within forty eight hours, and as it is absolutely necessary for the safety of the lower part of the city, no time should be lost in prosecuting it. The larger interests concerned should move in the matter as it will be worth thousands of dollars. to them, and by the expenditure of a paltry sum the surrounding country can be absolutely freed from any further trouble on account of overflows.
